they are really nice to me

They were very nice and ask me if I want something or I am good, also we talk about a lot of things.

They were friendly and funny

They were very nice, but not all of them know english

Because they are very good people and I can feel like in my house

Because they have been very polite with me and they have cared about me

Because I spoke with the brother but not with her parents because they didn't speak too much english

Both are good in english. We could describe words if we didn't know them

Because every morning we eat together and talk together and every time I can ask if I have some questions

Good translation of my exchange student, Hand Communication

The Parents couldn't speak English or German.

It was great, but the parents didn't know English.  
But Dominika, translated all and we talked a lot!

Everybody was so nice to me and we were talking a lot with each other. All in all the exchange was really worth it.

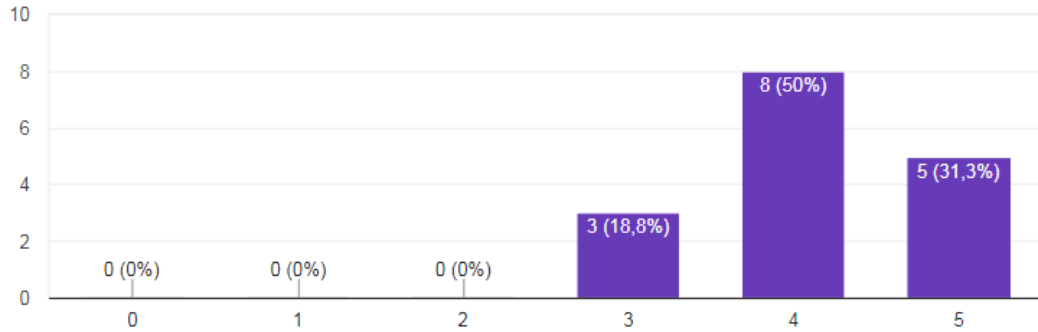

they spoke german

The parents were very good in english and I had no problems to speak with my exchange student or her parents.

Because they were so kind and always try to help me if I needed it.
