

**Auschwitz was quite difficult to bear. It showed us how bad life was during that time. We are ashamed of the ancestors because they violated all human rights. They treated the people like animals, for example, they slept on straw and 8 People slept on 3 square metres. Many died in few days, through exhaustion or by killing. Some survived also because they needed them for the economy in Germany. The ones who were unable to work were immediately taken to the extermination camp where they lost all their possessions, including their lives.**

**At last we want to point out that, it was hard for us to see how organised they were to kill the people, they wanted to kill.**
